## Acknowledgements

The Wastewater Management Plan is dedicated to G. Frederick Semoneit, who served as the Chairman of the Middlesex County Water Resources Association since May 2005. There are no words to describe the loss of our dedicated friend and colleague. Fred passed away on March 28, 2012 after a valiant fight with lung cancer. He maintained his optimism, sense of humor, and dedication to making the environment and our world a better place. Fred took such a genuine interest in the valuable work of his beloved WRA. Fred pushed for speakers, involved himself in policy, and ensured that the association meetings and events reached the high standard of professionalism that he expected. Fred oversaw all the complicated questions that arose during the development of this important document. There is no question that the document would not be at the point of being endorsed by the NJDEP were it not for Fred's patient guidance.

The staff of the Middlesex County Office of Planning would like to thank the staff of the New Jersey Department of Environmental Protection for all of their technical assistance and guidance during the preparation of this plan.

The preparation of this plan was supported by an American Recovery and Reinvestment Act of 2009, Clean Water Act Section 205 (j) (2), Section 604 (b) Grant.
