

# Intern Projects – Spring 2019

Lung Health Initiative

Pancreatic Cancer Walk/5K

‘Walk With a Doc’ Outreach

COAD (Community Organization's Active in  
Disaster) Resource Guide

BUILD Health Challenge Education Booklet

South Brunswick TNVM Program Analysis

# Lung Health Initiative

## SCOPE

The person assigned to this project would help support a Quit Line referral plan specifically geared towards physicians treating residents in Middlesex County who are smokers. Candidates should be highly organized with good communication skills, and comfortable with public speaking.

## MEASURE

Track number of physicians enrolled in Quit Line Referral Program

## CONTACT

The project lead for this program is the Regional Chronic Disease Coordinator, Viviana De Los Angeles.

# Pancreatic Cancer Walk/5K

## SCOPE

The person assigned to this project would help support the planning, communication and outreach efforts of the annual Pancreatic Cancer Walk/5K. Candidates should be highly organized with good communication skills, and comfortable with public speaking.

## MEASURE

Track number of pre-registered participants as well as number of secured vendors as result of varying outreach methods.

## CONTACT

The project lead for this program is the event chairperson, Sherie Wolpert.

# 'Walk With a Doc' Outreach

## SCOPE

The person assigned to this project would work to help promote and assist in the facilitating of a monthly fitness activity called "Walk With a Doc." Candidates should be highly organized, comfortable with working in groups, and have excellent communication skills.

## MEASURE

Track number of participants in each monthly activity, including compiling and analyzing feedback forms.

## CONTACT

The project lead for this program is Health Educator, Twyla Paige.

# COAD (Community Organization's Active in Disaster) Resource Guide

## SCOPE

The person assigned to this project would work with our COAD group on an initiative that would help to standardize, create and distribute a resource guide. Candidates should be highly organized, detail-oriented, creative and have good communication skills.

## MEASURE

Track number of participating entities and responsibilities in resource guide.

## CONTACT

The project lead for this program is LINCS Coordinator – Carrie Johnson

# BUILD Health Challenge Education Booklet

## SCOPE

The person assigned to this project would work with the BUILD grant group on an initiative that would help to standardize, create and distribute health education materials. Candidates should be highly organized, detail-oriented, creative and have good communication skills.

## MEASURE

Track number of resource recipients after inspection/home visits.

## CONTACT

The project lead for this program is Division Head – John Dowd

# South Brunswick TNVM Program Analysis

## SCOPE

The person assigned to this project would work with the South Brunswick advisory council to research and compile a cost-benefit analysis of existing TNVM (Track, Neuter, Vaccinate and Manage) programs in New Jersey and nation-wide for potential implementation in South Brunswick. Candidates should be highly organized, detail-oriented and have good communication skills.

## MEASURE

Create a cost-benefit profile for 3-4 existing TNVM programs measuring differences in minimum of 4 (but not limited to) different categories such as implementation, maintenance, logistics and medical costs.

## CONTACT

The project lead for this program is Director- Health Officer, Lester Jones.
